REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-42 are allowable over the prior art of record because the prior art of record does not teach a method of forming a sputtering target assembly comprising a backing member and a target member including slidably contacting a portion of at least one projection with a portion of at least one groove effective to generate frictional heat that softens and deforms the at least one projection; and partially fill said at least one groove, which said at least one deformed projection upon cooling and hardening thereby forming at least a mechanical bond between the target member and the backing member, wherein said member having said grooves is a metal having a melting point higher than that of the metal which comprises the projections.

Ivanov '863 the closest prior art of record does not teach the member having the grooves is a metal having a melting point higher than that of the metal which comprises projections, and the target and the backing member are slidably contacted effective to generate frictional heat that softens and deforms the projections such that they partially fill at least one groove on the other member, which upon cooling and hardening, form a mechanical bond therewith.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
